

# Yara Ihab Ismail

Rehab City, Cairo, Egypt | [yara.ihabb133@gmail.com](mailto:yara.ihabb133@gmail.com) | +20 1155371713 | <https://www.linkedin.com/in/yara-ihabb/>

## SUMMARY

Recent Computer Science graduate passionate about machine learning and data science. Seeking an entry level position to apply and grow my skills in data analysis, machine learning, and deep learning while contributing to solving real-world problems.

## EDUCATION

Ain Shams University | Bachelor of Computer and Information Science

2021 - 2025

Cumulative GPA: 3.64

## WORK EXPERIENCE

AI Internship | Global Brands Group

Aug 2025 – Present

- Developed AI-driven solutions using Microsoft Azure AI services, including Azure OpenAI (LLMs), Azure Document Intelligence, and Azure AI Search
- Applied prompt engineering techniques to improve LLM response quality and reliability
- Designed and deployed interactive Streamlit web applications to integrate and showcase the complete AI pipeline
- Built LangChain pipelines to orchestrate large language models with data sources and external APIs.

AI Task Reviewer | Outlier (Remote, Freelance)

Jun 2024 – Present

- Reviewed and evaluated large language model (LLM) outputs for factual accuracy, clarity, and relevance
- Provided detailed, constructive feedback to improve AI model performance

Machine Learning and Computer Vision Mentor | Applai Student Activity | Summer Training

2022 – 2023

- Instructed data preprocessing, cleaning, and analysis
- Conducted hands-on sessions on machine learning algorithms and models.
- Led training for senior students in computer vision and deep learning.

Mathematics Teaching Assistant for Secondary Stages (grade 10, 11 and 12)

2020 – 2023

- Gained experience in explaining complex concepts and improving communication skills

## LICENSES & CERTIFICATIONS

Generative AI Professional – AI & Data Science Track | DEPI

Jul 2025 – Jan 2026

- Practical experience in prompt engineering and LLM optimization.
- Strong foundation in Python, statistics, linear algebra, and data preprocessing.
- Built machine learning and deep learning models for real applications.
- Hands-on work with NLP attention models and computer vision using transfer learning.
- Understanding of generative AI concepts, including LLMs, GANs, and Hugging Face tools.
- Completed an end-to-end Generative AI capstone project (model development & deployment).

Neural Networks and Deep Learning | DeepLearning.AI

Oct 2024

- Completed foundational course on neural networks and deep learning techniques

Supervised Machine Learning: Regression and Classification | Coursera

Jun 2023

- Learned supervised machine learning concepts, including regression and classification

Employability Skills | ASU Career Center

Jan 2022

- Includes communication, teamwork, leadership, and workplace ethics

German Language Certificate | B1 Level (CEFR)

Jun 2020

## TECHNICAL SKILLS

Programming Languages: Python, C++, C#, Java, SQL

AI/ML Frameworks - Tools: Azure Document Intelligence, Azure Cognitive Search, Azure Storage, Git, Anaconda, TensorFlow, PyTorch, Scikit-learn, Streamlit, OpenCV, Pandas, Numpy, Seaborn, Matplotlib, BeautifulSoup, LangChain, LangGraph, GenAI, LLMs, Statistical Analysis, PowerBI

## SOFT SKILLS

Strong Communication, Teamwork, Leadership, Time Management, Adaptability, Problem-solving, Self-motivation

## EXTRACURRICULAR ACTIVITIES

---

### Machine Learning and Data Analysis Member | Applai

- Conducted data analysis, preprocessing, and applied machine learning algorithms.
- Worked with various datasets, including image processing and computer vision.
- Acquired SQL skills.

### Volunteer in Marketing Team | ASU Career Center

- Promoted and organized career week and employment fair events for students

### Media and Photoshop Member | MPS

- Learned Photoshop and editing skills

## PROJECTS

---

### CV Search App – Resume Parsing & Matching

Oct 2025

- Automated CV extraction and structuring using Azure Content Understanding & GPT models.
- Integrated LangChain and MongoDB for intelligent, skill-based candidate search.
- Reduced screening time and improved search accuracy for HR teams.

### The Knowledge Hub Chatbot – RAG Q&A System

Sep 2025

- Developed a RAG chatbot using web scraping, embeddings, and FAISS vector search.
- Integrated LangChain with Azure OpenAI for accurate, context-aware answers.
- Delivered 24/7 instant support and reduced manual inquiries.

### AL-Jeel – Document Intelligence

Aug 2025

- Built an automated pipeline for document extraction and search using Azure AI Search & Document Intelligence.
- Implemented OCR preprocessing and enrichment skillsets for accurate indexing.
- Improved document processing speed and reduced manual handling.

### EOG Signal Analysis & Classification

Jul 2025

- Extracted time/frequency features via filtering, FFT, Welch PSD
- Used ANOVA F-test and Min-Max scaling for feature selection
- Compared classifiers: SVM, RF, k-NN, Logistic Regression

### Movies Sentiment Analysis

Jul 2025

- Analyzed movie reviews using NLP and ML models for sentiment classification
- Engineered features using TF-IDF

### Animal Kingdom Classification | Kaggle Competition – 2nd Place

Jan 2025

- Used ResNeXt-101, ResNet152V2, and ViT with optimized preprocessing and data augmentation, achieving 95% accuracy using ViT

### Plant Classification & Disease Recognition

Jan 2025

- Built a CNN with fine-tuned ResNet-18 for plant classification
- Trained a Siamese network with triplet loss for leaf-based plant recognition

### Machine Learning–Aided E-Commerce Website

2024 - 2025

- Developed a smart e-commerce platform integrating ML models to enhance product search and user experience
- Implemented search-by-image using computer vision and search-by-text using NLP techniques
- Applied classification and recommendation algorithms to personalize product suggestions
